GUANGZHOU SHOUYI RESEARCH NEW MATERIALS CO., LTD.

Guangzhou Shouyi Research New Materials Co., Ltd. is a technology-riven company specializing in the R&D, manufacturing, and supply of cosmetic ingredients.

At Shouyi, we believe that the value of an ingredient is defined not only by its specifications and quality, but also by its performance in real formulations, formulation compatibility, and production stability.

In 2018, we established our Technical Service Center, providing customers with formulation support, application development, technical consultation, and solutions for R&D and production challenges. Our technical team works closely with customers to help optimize formulations and improve product performance and manufacturing stability.

Today, our modern Jingmen facility covers approximately 20,000 m² and commenced production in March 2024, with a designed annual production capacity of 10,000 metric tons, providing reliable manufacturing capacity and supply-chain support for customers worldwide.

We are more than an ingredient supplier — we are your long-term technical partner in cosmetic innovation.
